

NEAT – Time and Attendance

NControl Security Integrations introduces NEAT. NEAT is a scalable system that offers an easy to use and install system which provides the location of all asset and personnel in real-time and reports that show movement history.

The **NEAT** system offers options to enhance the functionality of the system. These options are designated into two different groups. The first group is subsystems, which are applications that are software based options. The second are devices, which are hardware devices with software that are added to the **NEAT** system.

HIGHLIGHTS

- Know hours worked per person
- Determine total hours worked by day, week, month or year
- Save or print reports
- Check Time Clock for accuracy
- Find hour theft by employees
- Add controls to standard
- Automate time clock functions
- Save time and Money

The **Time and Attendance** Subsystem uses stored information in the **NEAT** system to track and display amount of time personnel have been in a facility. As time clocks are dependent on personnel manually entering information (clocking in and out), the Time and Attendance subsystem does it automatically.

The T/A subsystem works in conjunction with the **NEAT Gate Logic** subsystem to determine personnel direction in and out of the facility using RFID readers mounted at each facility portal.

The T/A subsystem uses the information gathered by the Gate Logic subsystem to determine how many times a person has entered or left the facility during the day and how long the person was in the facility.

Use **NEAT Time and Attendance** to:

- Automate Time Clock functions
- Quickly determine the amount of hours works per person
- Check time clock for accuracy
- Calculate the total hours worked by all employees for a day, week, month or year
- Use in conjunction with **NEAT** to monitor personnel location within the facility

The information is stored in the **NEAT** system and can be accessed using the Time and Attendance reports.

The report options include:

- View all employees' hours by day
- View all employees' hours by week
- View all employees' hours by month
- View all employees' hours by year
- Hours by employee

These reports can be saved or printed as required.

For additional information on **NEAT Time and Attendance** please contact **NControl Security Integrations, LLC** at either sales@ncontrolsi.com or via telephone at (219) 285-0141.
